PROFESSIONAL SUMMARY

B.Tech Computer Engineering Graduated (in 2026) with practical experience in Java Full Stack and Android Development. Skilled in building REST APIs, object-oriented system design (MVVM), and database optimization. Winner of competitive hackathons with proven problem-solving abilities, seeking an entry-level Software Developer role to engineer scalable web and mobile applications.

TECHNICAL SKILLS

Languages: Core Java (OOPs, Collections, Exception Handling), JavaScript, React.js, HTML5, CSS3, XML, JSON
Frameworks & Backend: Spring Boot, Spring Security, Hibernate, Servlets, JDBC, Node.js, Express.js, REST APIs, JWT
Databases & Tools: MySQL, MongoDB, Room DB, SQLite | Git, GitHub, Maven, Postman, Docker, Android Studio, VS Code

PROFESSIONAL EXPERIENCE

Java Full Stack Developer Intern

Unified Mentor Private Limited

Remote

6 Months

- Developed full-stack web application modules using Core Java, Servlets, JDBC, SQL, HTML/CSS, and RESTful APIs.
- Designed relational database schemas in MySQL, implementing efficient CRUD operations and optimized query structures.
- Participated in Agile sprint planning, daily standups, and Git-based code reviews to systematically address backend issues.
- Conducted end-to-end API testing and documentation using Postman across all stages of the SDLC.

KEY PROJECTS

1. NutriScan – Personalized Health & Ingredient Analyzer

[\[Demo Video\]](#)

Role: Android Developer & Team Lead

Oct 2025 – Dec 2025

Technologies: Java, Android SDK, MVVM, Retrofit, Room DB, ZXing, OpenFoodFacts REST API

- Led a 3-member team to build an offline-first Android app using MVVM to scan barcodes and translate ingredients across 3 languages (English, Hindi, Marathi).
- Engineered a rule-matching engine cross-referencing additive databases and E-numbers against user health constraints to generate instant dietary risk alerts.
- Integrated ZXing optical scanner and Retrofit client, achieving sub-300ms scan latency with local Room DB caching that reduced redundant API calls by 40%.

2. Medicine Supply Management System with AI Chatbot

[\[Live Web\]](#)

Role: Full-Stack Developer

Jan 2026 – Apr 2026

Technologies: JavaScript, Node.js, Express.js, MongoDB, REST APIs, HTML5, CSS3

- Engineered scalable RESTful APIs in Node.js/Express and optimized MongoDB indexing to track real-time medicine inventory and supplier workflows.
- Integrated an interactive AI chatbot to automate stock queries, drug alternatives, and supplier availability; implemented validation middleware and deployed on Netlify.

3. Smart Mobile Store Web Platform

[\[Live Web\]](#)

Role: Solo Developer (Personal Project)

Apr 2026 – Jun 2026

Technologies: React.js, Firebase (Firestore, Auth), JavaScript, Tailwind CSS, REST APIs

- Engineered a responsive e-commerce web platform in React.js with multi-parameter catalog filtering and dynamic shopping cart state management.
- Integrated Firebase Auth & Firestore for role-based access and walk-in queue tracking; built an analytics dashboard deployed on Netlify.

ACHIEVEMENTS & EDUCATION

- 1st Place Winner:** SmartCops Hackathon Competition (*Phishing URL Detection System*).
- Competitive Coding:** Solved 75+ Data Structures & Algorithms problems on LeetCode.
- 3rd Place:** Aveskar Regional Competition in problem solving.

Bachelor of Technology (B.Tech) in Computer Engineering

2022 – 2026

Nanasaheb Mahadik College of Engineering, Sangli

CGPA: 10 / 10.0

LANGUAGES

English (Professional), Hindi (Fluent), Marathi (Native)
